

Shoe Sizing Chart

To determine your child's shoe size, please follow these simple steps:

- Print this page. When printing, make sure no adjustments are made through 'Expand/Shrink' page to paper size options.
- Use a ruler to confirm scale printed fine.
- Have your child stand up with a heel just touching the dashed line.
- If the longest toe falls between two sizes, select the larger size. For example, the gray footprint will be size 5 US.
- Measure the other foot as well. If one foot is larger than the other, choose the larger size.

We hope you find this chart helpful. Please call or email us with any questions you may have about this chart.

We are always happy to help and assist you!
